Mr. Cedrik Larose	Ceamine Solutions Ltd
TECHNICAL ABSTRACT	
<p>Ceamine Solutions is a company based in Rodrigues since 2017. Since our instigation, our vision is to help Rodrigues to move in the digital era. Considered as a developing country, Rodrigues still has a lot to do in order to benefit from all the advantages that Information Technology offers to this world.</p> <p>In line with this ideology, Ceamine Solutions is coming with a business model that will, on one side, show to the local population and visitors how Information Technology may help them and, on the other side, show to SMEs and larger businesses how they may benefit from the solution which Ceamine Solutions is proposing.</p> <p>The solution offered by the company is an application that will provide a listing directory of all different businesses, NGOs and services available in Rodrigues. With the possibility of GPS integration, a user may by simple access to the application, know which organisation is nearest to his/her location and also view rating based on what previous users have experienced in these different places. This application will be available on the Internet, Android like IOS platform.</p> <p>The access to the application interface will be free to the public but for those who want to advert their products and services, different pricing plans will be available where features and facilities offered will differ based on the type of plan rented by the client.</p> <p>With this solution, Ceamine Solutions wishes to make all the organisations and services offered in Rodrigues more visible to the local population and to the world potential visitors. At the same time, Ceamine Solutions has as objective to gain the necessary profit to ensure the maintenance and continuous upgrade of the service offered, thus ensuring the growth of the business.</p>	

Key Words: Rodrigues, Information Technology, businesses, SMEs, listing directory
