

## PROJECT SUMMARY

<b>Ref No.:</b> MRIC-CRIGS-A20	<b>Title:</b> 2TRAIN2EMPLOY
<b>Local Company:</b> Keep Moving Co Ltd	
<b>Collaborating Institution:</b> Université Des Mascareignes	
<b>Project Leader</b>	
Mr Ilrshad M. Goolamally	Keep Moving Co Ltd
<b>Research Collaborators</b>	
<b>Name</b>	<b>Organisation</b>
Dr Radhakrishna Somanah	Université Des Mascareignes
<b>TECHNICAL ABSTRACT</b>	
<p>2Train2Employ is a first of its kind concept for Mauritius and also Africa, providing an Online Skills Matching Platform (<a href="http://www.2train2employ.com">www.2train2employ.com</a>) merged with an E-Learning platform for jobseekers and employers. Compared to existing platforms which consider mainly the qualifications requirements, 2Train2Employ performs automatic matching on both qualifications and skills as per the demand and supply on the job market.</p> <p>The innovative E-Learning platform will foster focused training courses at subsidized cost to unemployed people including physically challenged people who are lacking required skills to be able to secure jobs in their career fields.</p> <p>With the rising number of internet and mobile users, the introduction of a Mobile App version will surely complement this innovative concept. It will be a one-stop point for jobseekers and employers to get instant matching employment information and guidance on portable devices.</p> <p>Moreover, an employment intermediary function added to the existing portal will help bridging the communication gap between employers' training needs and the proposed courses by the training institutions.</p> <p>With this innovative concept of using ICT in the Education/Employment fields, thousands of jobseekers will be empowered with required skills to fulfill the needs of hundreds of employers.</p>	
<p><b>Key Words:</b> Graduate Unemployment, Women, Skills Mismatch, Employers, physically challenged (handicapped) people, Focused E-Learning courses, Mobile App</p>
