

PROJECT SUMMARY

Ref No.: MRIC-PSTS-2203	Title: Sales Management Information System (MIS)
Local Company: NanoSAIO Ltd	
Collaborating Institution: The State Trading Corporation (STC)	
Project Leader	
Mr Jessen Valaythen	NanoSAIO Ltd
Research Collaborator	
Name	Organisation
Mr Keerunduth Samlall	The State Trading Corporation (STC)
TECHNICAL ABSTRACT	
<p>NanoSAIO Ltd, the Fintech arm of the Anglo African Group based in Mauritius, had entered in a collaboration with the State Trading Corporation (STC) and agreed to develop a module under the MRIC PSTS scheme. The system is called a Sales Management Information System (MIS) and will enable the STC to have a Sales Dashboard for analyzing and reporting on Sales trends as well as forecasting.</p> <p>This innovative tool will help STC to better analyse the trend regarding the sales of its products. Hence, the STC will be able to efficiently plan its stock management based on the automated information provided by the Sales Dashboard as well as help in providing on demand statistics. The tool will empower staffs of STC to better analyse the sales pattern and ensure that re-stocking is being done at the right time. As such this will ensure continuous supply of supply of STC's products in the market without any shortages.</p>	
Key Words:	
Sales dashboard, analyzing and reporting of sales trend, improve efficiency, empower staffs, automated information, re-stock at the right time, continuous supply, forecasting
