

PROJECT SUMMARY

Ref No.: MRIC/PCS-24-SG/01	Title: Mpow.me - Mentoring programme using AI powered mentoring app
Local Company: Tanzidev Co Ltd	
Project Leader	
Mr Tony Lee Luen Len	Tanzidev Co Ltd
TECHNICAL ABSTRACT	
<p>Mpow.me is a mentoring programme using an Ai powered app. Its first area of commercial application will serve to connect NGOs and grassroots innovators seeking guidance, advice, and support with experienced mentors who can offer personalised guidance and coaching. The app uses technology to facilitate communication between mentors and mentees, such as matchmaking, messaging and scheduling tools. The app handles the registration, matchmaking, managing, and reporting of a mentoring relationship. The app will offer a user-friendly interface that allows mentees to browse and search for mentors based on their industry, expertise, and availability. Once a mentor has been selected, mentees can schedule meetings and communicate with their mentor through the app. To ensure the quality of mentorship relationships, the app will incorporate a rating and review system, allowing both mentors and mentees to rate and provide feedback on their experience. Mentors will also have the option to accept or decline mentoring requests, ensuring that they can manage their workload and availability. The app will also have a resource section for users to access information, documents or templates. An artificial intelligence component shall be developed for the automatic matchmaking with best mentors for the request. Suggested mentors will be provided to the mentee. The app forms part of a programme. The programme consists of also onboarding mentors.</p>	
Key Words: Mentoring, artificial intelligence, training, NGOS, social innovation
