

Special Call for Proposals: Fast-Track innovative projects to counter the impacts of COVID-19

Discover Mauritius™ Mobile App for Health and Safety Alerts

GEO-TARGETING

GEOFENCING

Discover Mauritius™

Panda & Wolf will develop a new section of the Discover Mauritius™ App specially dedicated to the COVID-19 situation. The Section will inform Mauritians about the on-going health situation of the COVID-19 and will allow them to get Geolocated messages about the stock availability and the opening hours of shops around them. Thus helping to decrease the amount of people queuing at the shops and supermarkets. The new section will also feature a 'Self-Reporting Form' of the COVID-19 symptoms where Mauritians can report their Health status and their Geolocated information which can then be submitted to the concerned Health department. This function will help the local Health institutions to have a better control of the virus's spread and be aware of possible cases instead of the patient spreading the disease while travelling to the hospital.

TOTAL PROJECT VALUE

MUR 710,000
