

pazblé

INTELITÉGEN.

Made in Mauritius.

## Intelitegen Limited

pazblé will be a Social Media Application dedicated to blue-collar workers; plumbers, electricians, cleaners, mechanics, carpenters, construction workers, gardeners, and other such independent manual workers, connecting them to the general public in Mauritius.

pazblé will be a low data usage Web, Android, and iOS application on which Workers will register simply using a phone number and a chosen password. The Workers will be given the autonomy to manage their own profiles, create brand, showcase skills, and earn ratings and rewards.

Also serving as a database, the general public seeking such services may use the platform as a practical register.
