

## Mauritius Institute of Health

### Survey on Knowledge, Perception, Preventive Behaviour and Impact of COVID-19 in the Island of Mauritius

- ❖ The overall aim of the study is to inform the COVID-19 outbreak response measures, including policies, interventions and communications so as to help stop the spread of COVID-19.
- ❖ The project ensures better co-ordinated collaboration between researchers, decision makers, funders and international agencies.
- ❖ The translation of research and innovation into practice is expected to be spontaneous.

Total Project Value	Amount Funded	Duration
