Research Collaborator	
Name	Organization
Mr. Niketan Shah	ViitorCloud Technologies Pty Ltd - India
Team Members	
Mr. Ashwin Avish Auckel	Fusionlab Ltd
Mr. Prakash Bholah	Fusionlab Ltd
TECHNICAL ABSTRACT	
<p>MoWalet, will be digital wallet marketplace and a mobile app based on an open digital platform. This platform will enable any company or organization in Mauritius to create and manage their own branded digital wallet using currency, custom credit, or voucher-based wallets. Customers or users on the other hand, will have multiple wallets inside the single app from different companies, employers, providers, or issuers. Similar to social media platform like Facebook, that enables numerous companies to have their own page and interact with their fans, with our proposed platform, we will enable participating companies to issue their wallet in the app and promote it to their own customers base or even employees. Customers/Employee will register on the wallet using their mobile number. Based on the registered mobile number, the user will automatically be associated or invited to add different wallets from participating companies. Ex Insurance company, Retail shops, or Fast food outlets.</p>	
Key Words: Mobile app, digital wallet platform, multiple payment methods
